

Ultherapy Consent

In considering an Ultherapy® treatment with the Ulthera® System, please read the following information carefully and discuss any questions you may have with your physician.

The Ulthera® System delivers a low amount of focused ultrasound energy to the skin. The heat from the ultrasound stimulates new collagen to form. I understand that there can be discomfort during the treatment when the ultrasound is being delivered. I've discussed with my practitioner the options available to me to optimize my comfort during the procedure.

Risks and Complications

- Immediately following Ultherapy , the skin may appear red for a few hours. It is not uncommon to experience slight swelling for a few days following the procedure or tingling/tenderness to the touch for days to weeks following the procedure, but these are mild and temporary in nature.
- Occasional temporary effects may include bruising or welts, which resolve in hours to days, or numbness in a select area, which resolves in days to weeks.
- As with any medical procedure, there are possible risks associated with the treatment:
 - There is a remote risk of a burn that may or may not lead to scarring (either of which will respond to medical care)
 - Temporary nerve inflammation, which will resolve in a matter of days to weeks.
 - Temporary local muscle weakness may result after treatment due to inflammation of a motor nerve.
 - Temporary numbness may result after treatment due to inflammation of a sensory nerve.

Pregnancy

I am aware that pregnancy is a contraindication to this procedure, and I am not pregnant to my knowledge.

Payment

- I understand that this procedure is cosmetic and that payment is my responsibility. I have read the prices below and acknowledge that if I choose to proceed, payment is my responsibility. Discounts may be offered but are not guaranteed.

Full Face, Lower Face/Neck or Décolletage/Chest \$2000

Eyes/Forehead, Hands or Knees Treatment \$1000

Full Face and Neck \$3200

Full Face, Neck and Décolletage \$4200

Informed Consent

- It has been explained to me that the results vary from patient to patient, and, occasionally, the collagen building on the inside that helps counter the effects of gravity does not have a visible effect on the outside.
- I understand that results will unfold over the course of 2 to 3 months and that some patients may benefit from more than one treatment.
- I also understand that a non- invasive Ultherapy treatment is not intended to produce the same results as an invasive surgical procedure.
- The provider has explained to the patient/family/guardian the nature of my condition, the nature of the procedure, and the benefits to be reasonably expected.
- The physician has discussed the likelihood of major risks or complications of this procedure including the specific risks listed above and (if applicable) drug reactions, hemorrhage, infection, complications from blood or blood components.
- The physician has also indicated that with any procedure there is always the possibility of an unexpected complication.
